Subject regulation of cars and trucks in CA and other states

Dear Mr. Dickinson:

I read about the upcoming EPA hearing on May 22 and though I am unable to attend, I would like to send this note to encourage you and other EPA officials to extend a waiver to California (and other interested states) to allow them to regulate greenhouse gases from cars and trucks.

The recent Supreme Court hearing clears a path for this and for anyone who is concerned about the sustainability of our planet, this is good news. With so much greenhouse gas attributable to vehicles, it's important that we begin looking at our transportation choices and demanding higher levels of fuel economy and lower emissions standards.

I am the mother of a newborn and being a new parent has caused me to think even harder about what kind of world we are leaving our children. We have a moral obligation to do everything we can to reduce our environmental impact and to stem the tide of global warming.

I urge the EPA to do its part and grant this waiver. Thank you for your consideration.
